No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1980 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 17

Number 1, February 1980

Uri Liberman and Marcus W. Feldman. On the Evolutionary Significance of Mendel's Ratios. 1

Peter E. Smouse. Mathematical Models for Continuous Culture Growth Dynamics of Mixed Populations Subsisting on a Heterogeneous Resource Base: I. Simple Competition. 16

R. C. Griffiths. Lines of Descent in the Diffusion Approximation of Neutral Wright-Fisher Models. 37

R. C. Griffiths. Allele Frequencies in Multidimensional Wright–Fisher Models with a General Symmetric Mutation Structure. . . . 51

Hal Caswell and Alan Hastings. Fecundity, Developmental Time, and Population Growth Rate: An Analytical Solution. 71

Peter A. Abrams. Consumer Functional Response and Competition in Consumer–Resource Systems. 80

Number 2, April 1980

Gerald Borgia. Evolution of Haplodiploidy: Models for Inbred and Outbred Systems. 103

John H. Gillespie. The Stationary Distribution of an Asymmetrical Model of Selection in a Random Environment. 129

James N. McNair. A Stochastic Foraging Model with Predator Training Effects: I. Functional Response, Switching, and Run Lengths. . . . 141

Michael Turelli and John H. Gillespie. Conditions for the Existence of Stationary Densities for Some Two-Dimensional Diffusion Processes with Applications in Population Biology. 167

J. Merritt Emlen. A Phenotypic Model for the Evolution of Ecological Characters. 190

Rolf Heller. On Optimal Diet in a Patchy Environment. 201

Thomas L. Vincent and H. Ronald Pulliam. Evolution of Life History Strategies for an Asexual Annual Plant Model. 215

Graham H. Pyke. Optimal Foraging in Bumblebees: Calculation of Net Rate of Energy Intake and Optimal Patch Choice. 232

Michael E. Gilpin. The Role of Stepping-Stone Islands. 247

SAMUEL KARLIN. Models of Multifactorial Inheritance. V. Linear Assortative Mating as against Selective (Nonlinear) Assortative Mating. 255
SAMUEL KARLIN. Models of Multifactorial Inheritance. VI. Formulas and Properties of the Vector Phenotype Equilibrium Covariance Matrix. 276
LEV R. GINZBURG AND CARLOS A. BRAUMANN. Multilocus Population Genetics: Relative Importance of Selection and Recombination. . . 298
W. S. C. GURNEY AND R. M. NISBET. Age- and Density-Dependent Population Dynamics in Static and Variable Environments. 321
WILLIAM R. ENGELS. Loss of Selectively Neutral Alleles in Small Populations and Regular Mating Systems. 345
FJALAR FINNÄS. A Method to Estimate Demographic Intensities via Cumulative Incidence Rates. 365
M. UYENOYAMA AND M. W. FELDMAN. Theories of Kin and Group Selection: A Population Genetics Perspective. 380
